Mosaic Template Pack (225 Cubes)

Hockey Time
You and your team are building a Rubik’s Cube™ mosaic. Just like solving a Rubik’s Cube, building a mosaic must be done in careful steps. Unlike solving a Rubik’s Cube, you’ll need to take your time. Rushing the mosaic building process is the fastest way to make a mistake and mistakes can sometimes take over an hour to correct.

One of you will be the Leader and the rest of you will be Builders. It’s important that the Leader keep track of the progress of the entire mosaic while the builders will stay focused on their sections.

This mosaic is made up of 9 sections. Each section has 25 cubes. There are a total of 225 Rubik’s Cubes. The leader will need to pay attention to each section being build by the builders and make sure that the sections are all double-checked and then placed in the correct order. Each of the 9 section pages of this template have a special number that looks like this:

```
03 - 02 - 08
```

The first number is the row; there are a total of 3 rows. The second number is the column; there is a total of 3 columns. The last number is the section number; there is a total of 9 sections.

Each Builder will be given a section to work on by the Leader. Each Builder should only work on one section at a time. After each cube, cross it out on the page with a pen. When a Builder is finished with their section, they need to check that each cube is in the correct pattern and orientation as what is shown on their section page. Once they’ve checked, they will call for the Leader to double-check the section and then will be instructed by the Leader where to place their section. Be very careful when moving your sections. Don’t pick up too many cubes at once, two or three at a time but never more. It’s very easy to drop your cubes at this point. Use baking sheets or lunch trays to move sections close to the mosaic and then move the cubes from the trays to the mosaic.

It’s exciting to help build a Rubik’s Cube™ mosaic. Remember to listen to the Leader’s instructions, be patient, and have fun!

Materials:

- 225 Rubik’s Cubes™
- Mosaic Template Pack
- Baking sheets or lunch trays
- Pens or pencils
- Raised work surface
- Lots of open floor
