Mosaic Template Pack (400 Cubes)

Michelle Obama
You and your team are building a Rubik’s® Cube mosaic. Just like solving a Rubik’s Cube, building a mosaic must be done in careful steps. Unlike solving a Rubik’s Cube, you’ll need to take your time. Rushing the mosaic building process is the fastest way to make a mistake and mistakes can sometimes take over an hour to correct.

One of you will be the leader and the rest of you will be builders. It’s important that the leader keeps track of the progress of the entire mosaic while the builders will stay focused on their sections.

Each section has 25 cubes. The mosaic consists of a total of 400 Rubik’s Cubes. The leader will need to pay attention to each section being built and make sure that the sections are all double-checked and then placed in the correct order.

Each of the section pages in this template have a special number that looks like this:

```
ROW  COL  NUM
04    04    16
```

The first number is the row; there are a total of 4 rows. The second number is the column; there is a total of 4 columns. The last number is the section number; there are a total of 16 sections.

Here’s a visual to help you understand better:

```
ROW  COL  NUM
  0  1  2  3
```

Materials Needed:
- 400 Rubik’s® Cubes
- Mosaic Template Pack
- Baking sheets or lunch trays
- Pens or pencils
- Raised work surface
- Lots of open floor

It’s exciting to help build a Rubik’s Cube mosaic. Remember to listen to the leader’s instructions, be patient, and have fun!
